Basic Electrical Principles

Number of delegates: 8
Duration: 2 days
Location: Horsley Cross

Who should attend

This course is designed for delegates who have little or no knowledge of electrical principles.

Objectives

On successful completion of the course delegates will be able to:

- Understand fundamental units
- Test basic circuitry and understand principles
- Demonstrate an understanding of Ohm's Law
- Understand the principles of series and parallel circuits
- Understand the principles of magnetism
- Demonstrate that they can use a test meter safely on the correct settings

Learning approach

50% theory using PowerPoint, active discussion, diagrams and visual aids.

50% practical with demonstrations on a variety of electrical and electronic equipment and hands-on practice with test meters.

A theory assessment will be carried out to check delegates' understanding.

Pre-requisites

Ideally the candidate will have a good knowledge of the English language and some electrical experience would be an advantage.
