Cable Jointing

Number of delegates: 6
Duration: 1 day
Location: Horsley Cross

Who should attend

This course is designed for delegates who are likely to be required to joint a copper cable.

Objectives

On successful completion of the training course the delegates will:

- Understand the basic principles of cable jointing
- Be capable of performing a cable joint on various different types of cable
- Be capable of selecting the correct type of joint and equipment to perform a joint in a safe manner
- Be able to test the cable after it has been jointed to ensure it has been successfully completed

Learning approach

20% Classroom based with PowerPoint, pro-active discussions, diagrams and drawings

80% practical completing cable joints on various types of multicore and single core cables.

Pre-requisites

Ideally the delegate has a basic understanding of the railway industry and is aware of different types of cables trackside.
