Clamplock Installation and Maintenance

Number of delegates: 6
Duration: 4 days
Location: Horsley Cross

Who should attend

This course is designed for delegates who will be involved in clamplock installation for point layouts and delegates whose work involves the maintenance and/or fault finding of clamplock point layouts. The course is mechanically-biased however it is anticipated the candidate has diagram reading experience.

Objectives

On successful completion of the training course the delegates will be able to:

- Understand the drawings and handbooks associated with clamplock installation
- Be able to layout parts ready for installation
- Understand and be capable of using the correct tools for installation
- Install components to operational specifications
- Check installation works to specifications ready for testing
- Identify major components within a clamplock mechanism
- Understand and recall the principle operation of the clamplocks
- Undertake first line fault finding and maintenance of the clamplock in accordance with the Network Rail documentation

Learning approach

30% classroom-based including theory sessions using PowerPoint presentations and visual aids.
70% practical sessions on a working set of clamplocks.
Theory and practical assessments to verify delegates understanding.

Pre-requisites

Ideally the candidates should have attended a Basic Signalling 2 course and Diagram Reading course or equivalent.
