Telecoms Appreciation Course

Number of delegates: 6
Duration: 2 days
Location: Any suitable training site

Who should attend

This course is suitable for delegates who wish to obtain a basic level of knowledge of operational telecoms.

Objectives

On successful completion of the course, delegates will have covered the following areas:

- General introduction to railway telecommunications including the correct terminology and abbreviations used
- Background of railway telecommunications
- Various telecoms cables used on the Network Rail Infrastructure
- Different types of terminations of telecoms wires
- Power supplies and standby units
- Cable routing and clamping mechanisms
- Various communication networks available

Learning approach

100% classroom-based with PowerPoint presentations and visual aids
Theory assessment to check the delegate's understanding of the course content

Pre-requisites

Delegates need a good understanding of the English language.
