Signal Works Testing Module 3A

Number of delegates: 6
Duration: 3 days plus 1/2 day one-to-one assessment per delegate
Location: Horsley Cross

Who should attend

This course is designed for delegates who plan to undertake a role as Works Testing Verifiers for testing within a factory environment. It is for delegates who already have a railway signalling background and testing knowledge.

Objectives

On successful completion of the training course the delegates will have a basic understanding of how to do the following:

- Use test equipment correctly and safely
- Perform Location verification tests
- Carry out cable testing
- Complete Panel inspection, wire count and continuity tests
- Complete equipment inspections, wire count and continuity tests
- Document and record test activities to the required standards

Learning approach

40% classroom-based using diagrams, PowerPoint presentations and visual aids.
60% practical sessions working on a variety of equipment.
Theory and practical assessments are undertaken to verify delegates understanding.

Pre-requisites

Ideally the candidate should have attended Diagram Reading and SPWEE courses and have a good knowledge of installation standards prior to attending the MOD 3A course.
